

# WHAT'S MY SECTOR?

**INSTRUCTIONS:** Once you have determined you wish to be covered under the MSGP, use the following table to determine where in the MSGP (which sector in the MSGP) your specific permitting requirements can be found. First, find your Standard Industrial Classification (SIC) code in the following table. After you have found your SIC code, find the code's associated sector at the top of its section. For example, if your facility was a sand and gravel mine your SIC code would be 1442. Looking up 1442, you find 1442 is within the general code of 144X at Sector J -- Mineral Mining and Dressing. Further, you note that 1442 is part of subsector 2 and that chemical monitoring is required for your facility. Some activities (e.g., landfills) do not have a SIC code. If there is an NA for the SIC code, refer to the description of the "activity represented" for the associated sector. Once you have obtained your sector, turn to that sector in the MSGP for specific permit requirements.
